FOUNTAIN SOLUTION TANK CHILL PACK RETROFIT

*Exceptional by Design,
Quality & Simplicity*

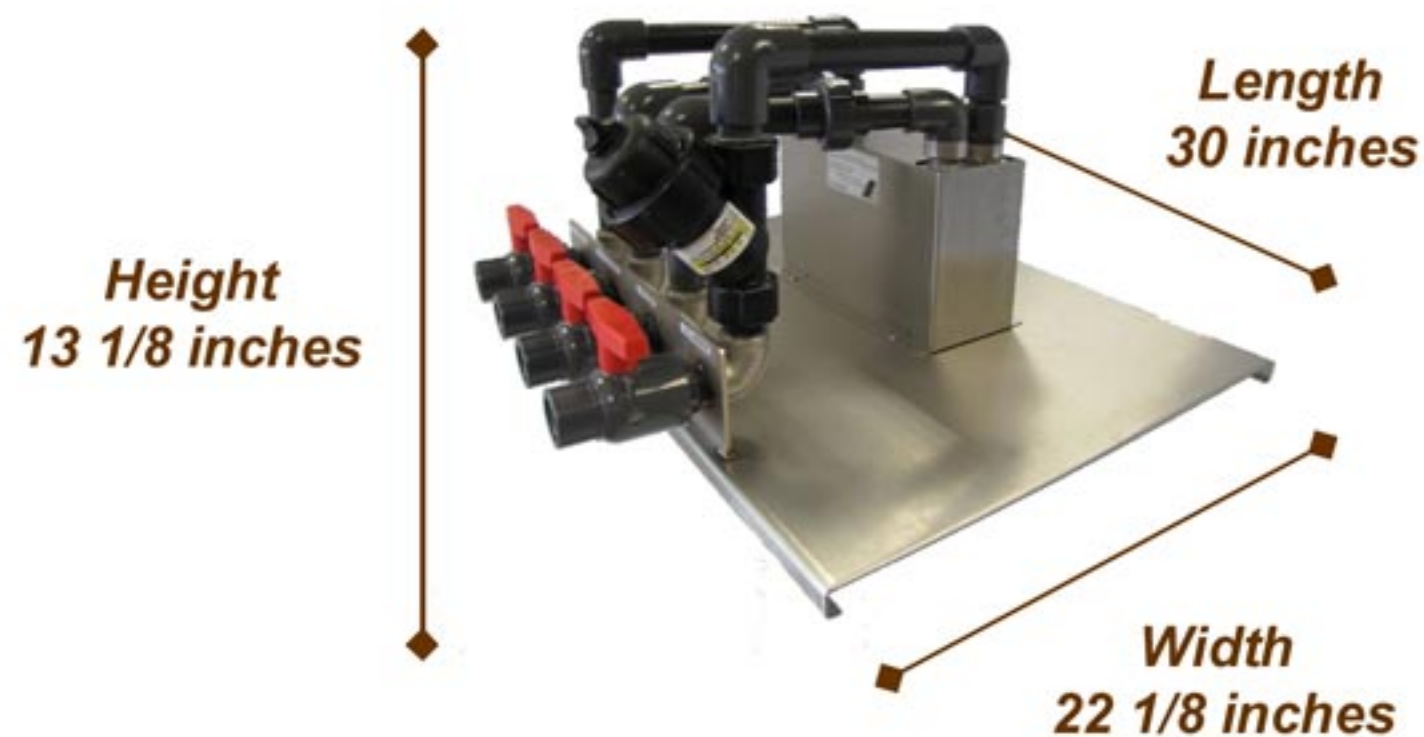

Fountain Solution Tank Chill Pack Retrofit

- Replace inoperative costly failed compressors by using your existing water chiller to chill your fountain solution
- 250,000 Btu of chilling at 96% efficiency (20 + tons)
- 96% efficiency means if your water chiller temperature is set at 60° f. this system will give you 63° - 64° f. chilled fountain solution just in time
- Just in time means the fountain solution is chilled on its way to the press not expending energy to chill the holding tank
- Zero waste heat exhausted into your facility from compressors
- For every ton of compressor waste heat introduced into your facility, it is required that 1.25 tons of air conditioning is necessary just to offset waste heat
- Slide out inoperative compressor system and slide in the FSTCPR
- 12 month 100% Parts and Labor limited warranty
