

# WATER PAN DELIVERY DISTRIBUTION SYSTEM

## Key Benefits

*Allows higher flow rates with uniform in-flow spread over a greater distance*

*Directs water inches from the base of the pan roller*

*Mounting on gear, operator, front or back of the water pan*

*Uniform in-flow to out-flow pan temperatures*

*Easy removal for maintenance*

*Cleaner water pans*

*Water Pan delivery system*

*Pan not included*

*Manufactured with 316 & 304 Stainless Steel*

*Easy to direct chilled fountain water to the exact point on the pan roller (just under the water level)*
